

# Retail Price List

"SCOTTS" BRAND is the highest quality seed available. It is carefully selected and noxious weed free. Most lots will test 99.75% pure seed or higher.

April-May, 1957

CHOICE BRAND: Choice, clean seed, low in weed content. Higher quality than is generally available at comparable prices. Top quality seed used in all mixtures.

LIBRARY  
APR 9 1957  
U.S. Department of Agriculture

THE SCOTT FARM SEED COMPANY warrants to the extent of the purchase price paid that, at the time of delivery, the seeds we sell are as described on the tag attached thereto within recognized tolerances. We give no further warranty, expressed or implied.

Sericea (Perennial-Hulled)	..... .26 lb.	.....

All Legume Seeds require inoculation for top yields

## SCOTTS Heavy Duty Pasture Mix

\$ .46 lb.

Spring Pastureland Mix is a blend of the most desirable grasses and legumes to suit a variety of soil, moisture and fertility conditions as found in typical permanent pasture fields.

This mixture contains 35 per cent legumes and two-thirds grasses by weight. All seeds are high in quality and germination, low in weed content and free of noxious weeds. Sow 25 lbs. per acre for a new pasture and 12-15 lbs. per acre for reseeding.

## SCOTTS Heavy Duty Pasture Mix

\$ .46 lb.

Fifteen per cent Ranger Alfalfa and a total of 35 per cent legumes in this high yielding mixture that is also suitable for hay or first cutting silage.

SCOTTS Heavy-Duty Mix is suggested where the field is to be left in pasture for at least five years and where heavy grazing is desired. Apply fertilizer, and lime where needed, and follow recommended seeding methods. Sow 25-30 lbs. per acre.

## SCOTTS Soil Building Mix

\$16.50 bu.

A balanced legume mixture for soil building and plow under. May be used for pasture or hay. Contains Mammoth, Sweet Clover and Alfalfa. Sow 12-15 lbs. per acre.

# S C O T T S® Hybrid Seed Corn

SCOTTS Hybrid Corn is carefully produced and processed for vigorous, healthy, high germinating seed. It is triple-graded for trouble-free planting and treated to increase stands when soil conditions are unfavorable.

## Scotts Hybrids

Maturity	Flat Grade	Quan.	\$ Amt.
SCOTTS 11 (90-95 days)	\$11.00 bu.	.....	.....
SCOTTS 33 (100 days)	11.00 bu.	.....	.....

This high yielding early hybrid is well suited to short seasons, or may be used when regular planting is delayed. It dries fast in the field, cribs early and produces sound and solid ears. SCOTTS 11 is tops in its maturity class!

Consistently outyields everything in its class, plus beating many longer-maturing hybrids. Develops a solid, average-sized ear, and will crib ahead of fall wheat seeding. More acreage planted with SCOTTS 33 each year.

SCOTTS 66 (105 days)	\$10.00 bu.	.....	.....
SCOTTS 72 (110 days)	10.00 bu.	.....	.....

This healthy, vigorous growing hybrid gives excellent yields of good quality corn over a wide range of soil and fertility conditions. SCOTTS 66 is a dependable big producer that dries out easily enough to be followed by winter wheat.

This "main crop" SCOTTS Hybrid matures right for top yields, yet early enough to harvest before bad weather. SCOTTS 72 is strongly resistant to stalk rot, blight and other diseases. An excellent crib corn that picks clean. Beautiful appearance.

SCOTTS 75 (115 days)	\$10.00 bu.	.....	.....
SCOTTS 99 (120 days)	10.00 bu.	.....	.....

Strong roots and a sturdy stalk put SCOTTS 75 at the head of its class. Adapted to a wide range of soil and climate conditions, it's well-suited to mechanical harvest. Ears dry fast, pick easily and clean. A top crib filler that will produce good silage, too.

A fast, vigorous grower with strong roots and stalks that yields big ensilage tonnage or excellent crib corn. SCOTTS 99 is an all-around top production favorite that dries out rapidly in the field, picks clean and cribs nicely. Not as tall as U. S. 13.

SCOTTS Medium Blend \$10.00 bu.	.....	.....	.....
of three hybrids in the medium maturing class. Mixing several hybrids helps insure full pollination, reduces drought damage, makes more certain a corn crop under adverse conditions and frequently increases yields.			

## SEED TREATMENTS
